Web Scraping Scheduler

Provide a 1-2 page of marketing findings based on your scraped information that you submitted in the 'Web scraping assignment – planning' assignment. Check for any differences in prices or consumer ratings across product level and retailer level. Make a marketing recommendation to the manufacturer and retailer based on the information.

Submit your scheduled scraped prices and consumer ratings for the products and retailers, 1-2 page marketing findings/recommendations, and also submit your python program.

Submission directions
A Word document that shows your scheduled scraped prices/consumer ratings and 1-2 page marketing findings/recommendations.
